

# THROSTON PRIMARY SCHOOL

A Flying Start to Success

Wednesday 12<sup>th</sup> June 2013

## TESTIMONIAL

On Friday 7<sup>th</sup> June 2013, Throston Primary School was fortunate to have an audit of ICT within the school. This audit was conducted by Christine Jack from 'Kaleidoscope for Learning'.

The audit consisted of lengthy conversations with the ICT co-ordinator and a tour of the school to view and discuss ICT provision.

The audit was organised in advance, which allowed the ICT co-ordinator to prepare paperwork. During the audit, strengths and areas for development were identified.

I feel the audit was conducted in a very professional manner, and was 'done with us' rather 'done to us'. The findings provide an accurate baseline for ICT within the school. We can now plan to move forward and prepare to implement the 2014 'Computing Curriculum'.

It is worth stating that not only did the ICT co-ordinator and I find the audit a useful process, teachers and governors have both found the report easy to read and informative. It is now hoped that such an audit will become a regular part of our school self-evaluation cycle.

I would certainly recommend 'Kaleidoscope for Learning' to audit ICT within schools, as not only do you receive an accurate audit of ICT provision, you also receive high quality materials and sound advice from an expert ahead of the game.

Kindest regards

Mark Atkinson  
Head Teacher
